

ALVAN BLANCH

Processing the World's Crops

conveyors-chain&flight

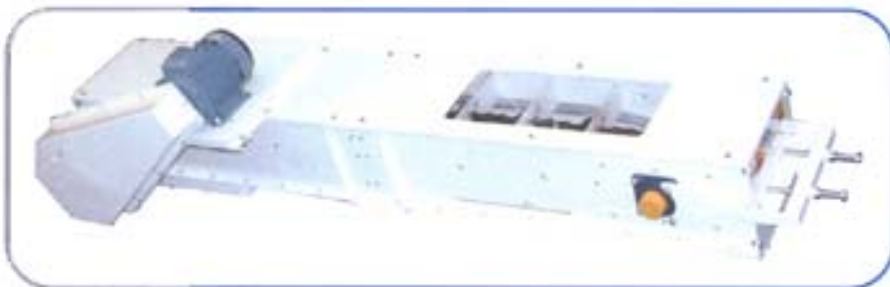

Reliability through over 50 years experience of manufacturing & design

Capacities of up to 330 m³ / hr

Each machine tailored to individual customers requirement

- Robust extended pitch chain with tensile strengths of 15000lb and 25000lb to suit conveyor, with stainless steel option available
- Wear strips fitted to base and return rail for scraper type chains
- All joints make use of countersunk bolts and lap plates to provide a strong mechanical fit and smooth internal face
- Flanged inlets and outlets
- Full time design office
- Horizontal, curved and inclined conveyors available
- All bolted & rivetted construction

ALVAN BLANCH BULK HANDLING gives you complete confidence

- Intermediate outlet options
 - Hand operated with rack and pinion
 - Electro-pneumatic
 - Electric
- A range of chain speeds to suit various products
- Drive configurations to suit customer preferences:
 - Vee belt drive to shaft mounted speed reducer
 - Geared motor drive with chain and sprocket final drive
 - Shaft mounted gear motor
- Construction options:
 - Stainless steel
 - Galvanised steel
 - Mild steel powder coat painted
