crops for over 50 years**

Knapsack Sprayer L.20

The Alvan Blanch L20 is a high quality sprayer which has been extensively tested in a variety of applications, in Europe, Africa and elsewhere. It operates to a fine degree of accuracy and control and is suitable for a wide range of crops.

The adjustable one piece nozzle can regulate output from a fine mist to a strong pressure jet (up to 3 m long) so that a height of 7m can be reached . Spraying width is up to 80cm. It is only necessary to turn the nozzle to obtain the required effect.

Mistblower/duster L.80A

The L.80 is designed for the spraying of fungicide and insecticide in soft fruit trees/bushes, fruit and salad crops under glass and polythene, also the application of disinfectant in and around ventilated buildings i.e poultry houses.

5hp two stroke engine.

Large diameter fan has an air displacement up to 20m³ per min.

Speeds up to 450kph.

Variable flow control from 0-2 litres per min.

Effective reach up to 17m in calm weather.

Well padded back support and harness.

Recoil starter pull and electric engine cut-out are standard.

The L.80 makes an ideal spray applicator for fungicides and insecticides at low volume spray applications where access to target is limited. By simply removing two plugs from the spray tank and installing two outlet pipes, the L.80 is quickly converted to a powder duster.

Model L.80A
Capacity 14 Litres

In accordance with our policy of continuous development, we reserve the right to change specifications and prices at any time without notice or incurring liability to purchasers. All goods supplied according to our published terms and conditions of sale (copies on application)
