

## COFFEE PULPERS

## DISC

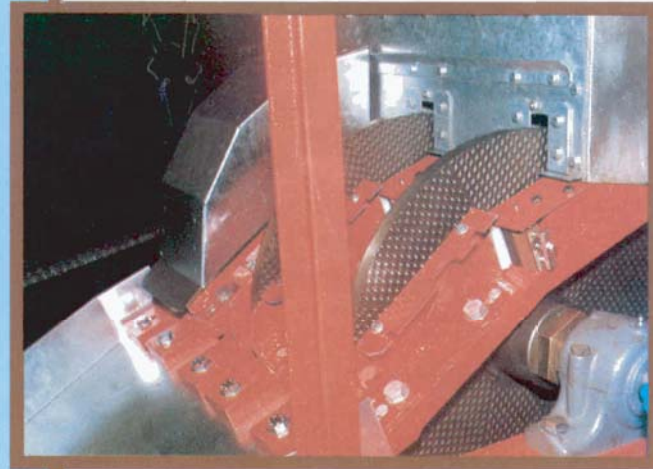

Electric Twin Disc

Hand Operated Single Disc

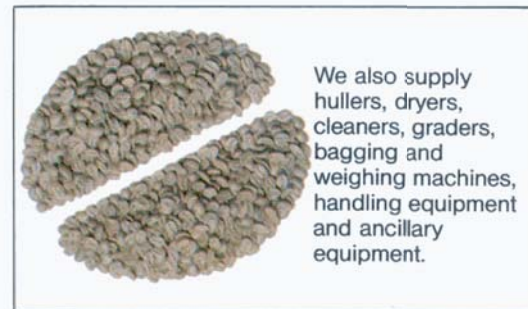

Disc Pulpers

Supplementing the range of drum pulpers, single disc through to 4 disc pulpers are available. The single disc being available for hand operation. The multi-disc units can be powered by diesel engines or electric motors.

In cases where quality of product is essential, the multi-disc units are supplied with nylon fingers and coupled to a pre-grader unit which selects by size and bulk density (in water) prior to fermentation.

A single disc repasser can be coupled to this system for pulping any of the unpulped green cherries.

We also supply hullers, dryers, cleaners, graders, bagging and weighing machines, handling equipment and ancillary equipment.

## TWIN DRIVEN PULPER

Drum Pulper

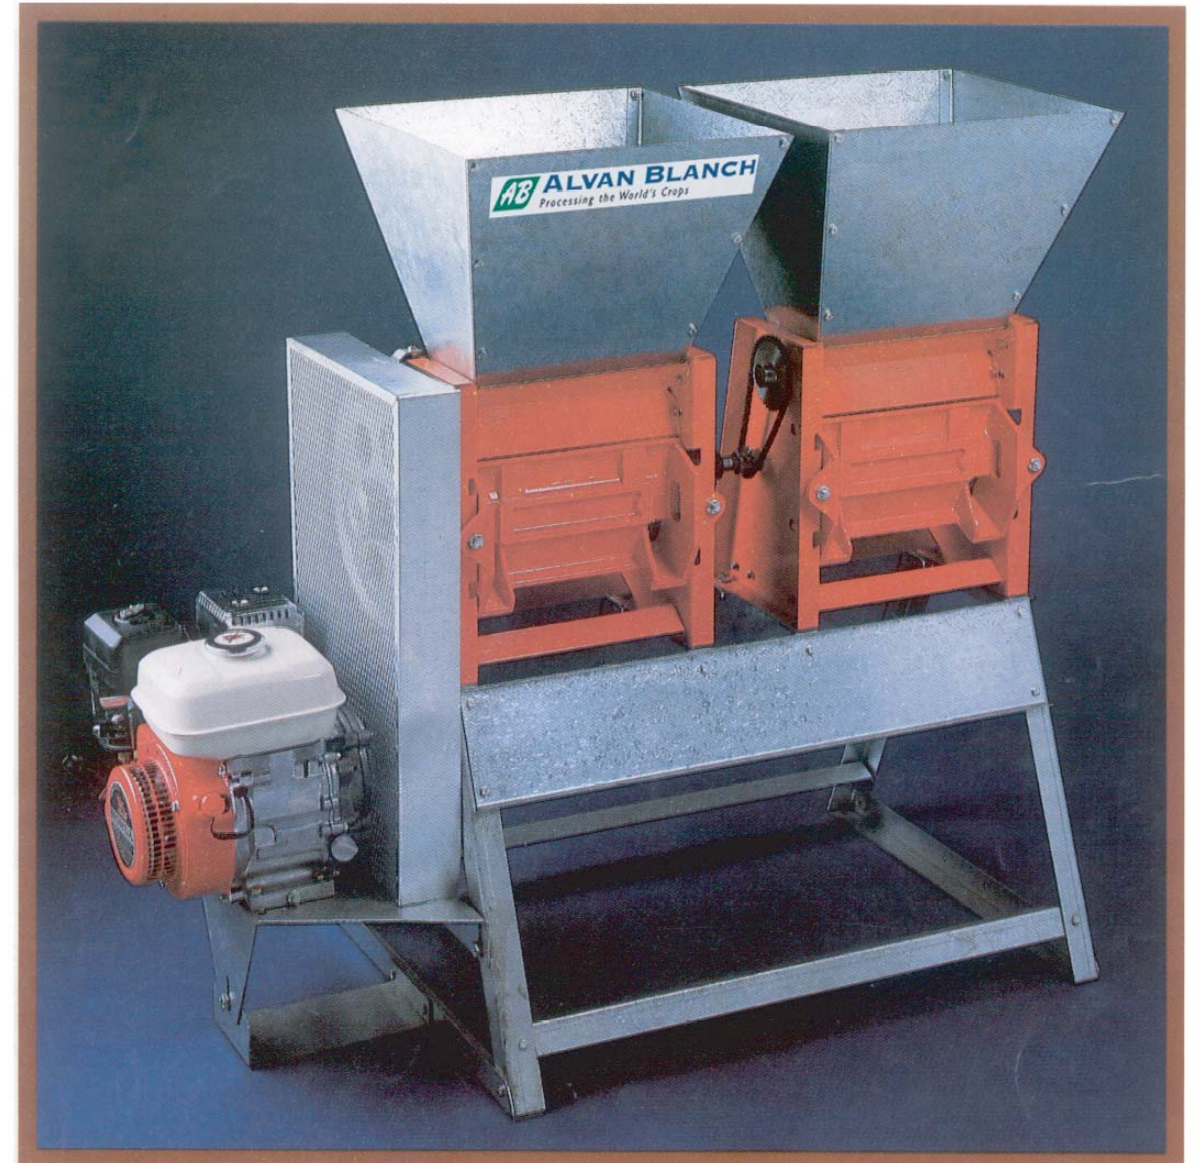

Hand Operated Pulper

An established range of coffee pulpers for rural through to industrial plantations incorporating many proven features on all models both drum and disc type.

The **Blanch** drum pulper is available in a number of configurations to suit all applications from the simple hand operated unit through petrol, diesel and electrically operated units, including multi drum machines. Principal features of the drum pulpers are the large capacity holding hopper, and self lubricating oil-lite bushes. The unique aluminium pulping breast is easily adjustable to accommodate all types of coffee. The pulpers durability and light nature combine to help transportation in the rural areas.

In addition to the hand operated models all sizes can be powered by petrol, diesel or electric motors which enables them to be operated in any location. Hand operated units may be retrospectively converted to powered units by simply adding the desired drive arrangement. In addition units can be coupled to accommodate future increase in production.

Petrol Engine Driven Twin Pulper
