

## **New Alvan Blanch oil press produces fuel from oil seeds**

Visit Marrison Grain at the Royal Norfolk Show, stand no.308, to view probably the widest range of fixed equipment at the show.

Find out the latest in grain drying and storage equipment, including grain stirring, fixed and mobile grain drying, mobile pre-cleaner, Collinson bulk feed hoppers and livestock feeding equipment, grain aeration and monitoring equipment, modulating gas burners and new this year the Alvan Blanch roller mill and oil press.

The oil press is significant as in the not too distant future farmers will be able to produce their own

fuel and Alvan Blanch will introduce their new oil press specifically designed to process a range of oil seeds with minimum, if any, pre-treatment, say Marrisons. The oil press can be used on a wide variety of raw materials including sunflower, rape seed and linseed. This new oil press has been designed with safety and ease of operation as the main consideration. A robust frame for strength and durability is utilised with a large feed hopper and agitator. A high grade stainless steel collection hopper and discharge chute is provided for oil and cake recovery. **FG**
